

Standard Home Features

At W.B. Garrett, our homes are built using quality products and materials. Things that might be considered upgrades with larger production builders are included with a W.B. Garrett home, and we strive to give our homeowner's as many options as possible to customize their homes.

Perhaps the most valuable included feature is our personal attention to detail throughout the entire homebuilding process – and that is what sets us apart. There are plenty of builders in Richmond to choose from, but as our customers will tell you, nobody builds a home with more thoughtful attention to detail like Bill Garrett. He builds every home as if he was building it for himself – with that same level of craftsmanship and quality he would want for his family. And our homeowner's are so thankful that he does!

His commitment to quality is backed by two warranty visits, one at 60 days and another at 11 months after your home is completed. Warranty service request information will be provided to you at walk through to ensure your continued satisfaction in your W.B. Garrett home. In addition, a 5-year Residential Warranty Company, LLC (State Specific) warranty is also included.

In the end, it's the person behind the building that makes the difference. The person that stands behind every home they build that is the most important included feature, and there isn't anybody better than Bill Garrett.
